Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to claim 1, the applicant fails to provide any structural relationships between the frames. Note also that the stabilization frame is only connected to the back frame and that the back and front frames are not connected in any way.

Further, though not an ambiguity per se, when the applicant claims front and back frame of different lengths in claim 6, claim 1 does not orient what is “front” or what is “back”. The same can be said of claims 4 and 5 with respect to the location of the steps.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Seidner #2,207,445. Seidner discloses a ladder and platform assembly comprised of front/back frame 15, 16, back/front frame 2, 35, which shorter than 15, 16, L-shaped metal plate steps 17,

23, pivoting chair frame 30, 31, 80, frame pivot connections 28, 38, pivoting stabilization bars 4, 43, and pivoting armrests 81.

*Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Seidner as applied to claims 1, 2, 4-6 and 10 above, and further in view of Hultquist #3,022,524. Seidner fails to disclose a floatation device attached to the chair. Hultquist teaches the utility of a floatation device 10, 14, secured to a chair frame assembly 20, 22, 28. An assembly such as this, provides a life preserver for a user when so needed. Therefore to one of ordinary skill in the art, it would have been obvious to provide the assembly of Seidner with a floatation device as taught by Hultquist, so as to provide a means for water safety when needed.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Seidner as applied to claims 1, 2, 4-6 and 10 above, and further in view of Larson #3,151,910. Seidner fails to disclose a fishing pole holder. Larson teaches the utility of a fishing pole holder 31 secured to a chair assembly, allowing for storage of a fishing pole when so used. Therefore to one of ordinary skill in the art, it would have been obvious to provide the assembly of Seidner with a fishing pole holder as taught by Larson so as to allow for storage of a fishing pole when so needed.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Seidner as applied to claims 1, 2, 4-6 and 10 above, and further in view of Stanley #5,881,839. Seidner fails to

disclose a chair secured to the frame. Stanley teaches the utility of a chair 73 secured to a platform 4 of a chair/ladder/platform assembly 2-4 that allows for a user to sit thereon when so needed. Therefore to one of ordinary skill in the art, it would have been obvious to provide the assembly of Seidner with a chair as taught by Stanley, so as to allow for a user to sit thereon when so needed.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vadner #3,357,741, Woolfolk, Sr. #3,967,694, Heberlein #5,582,268, and Lopacli #6,637,549 are cited to teach ladder and platform assemblies.
